

# SmartSpreadSheet™ - Collaborative Excel for the Enterprise

**How do you easily change, control, manage and share secure real-time information within the enterprise and with your suppliers and vendors?**

**With SmartSpreadSheet!**

SmartSpreadSheet for the enterprise is the collaborative component of the webPUBLISH™ Supply Chain/Logistics Visibility toolset. Intuitive by design, SmartSpreadSheet provides users with all the functionality and familiarity of Excel, but with added technology, and security of centrally managed data in an integrated database environment.

SmartSpreadSheet enables users to easily work with combined data from various sources in an integrated database to edit, customize, format, and refresh the data from within a collaborative Excel template.

***SmartSpreadSheet sits on the desktop, can be accessed and updated by multiple users simultaneously from the Internet, anywhere, anytime.***

## **Never Ask Again;**

1. Who has the latest copy of Excel?
2. Is this the most current data?
3. Where did the data come from?
4. Who changed the data, when, and why?
5. How can we share changes with our suppliers?
6. How can our remote sales people get us updates more quickly?

## **SmartSpreadSheet Features and Benefits**

- Real-time data connection
- Intuitive, easy to use
- Adapt quickly to changes
- Central data management
- Team based collaboration
- Rapidly adjust plans/schedules
- Secure, permission based access
- No persistent data storage on desktop
- Improve Supply Chain/Logistics Efficiencies
- Rapid integration into multiple data sources

## **Gain Immediate Visibility and Control**

**Forecasting** – Maintain a more accurate forecast with field sales and customer updates.

**Planning** – Adjust plans as changes occur in demands and material availability.
